

## Mile High Labs Launches 'Tinctures On Tap' For CBD Product Manufacturers

### MILE HIGH LABS

**BOULDER, Colo. | May 17, 2019** /[Canna Newswire](#)/ | In response to overwhelming demand from CBD product manufacturers in the U.S. and abroad, Mile High Labs today announced the addition of flavored tinctures to its best-in-class CBD product portfolio.

Tinctures are available for purchase in 1.9-liter, 100-liter, and 200-liter barrels of Extra (500 mg of CBD per 30 ml) and Ultra strength (1000 mg of CBD per 30 ml) formulations.

Mile High Labs tinctures are available in mint, blood orange, melon and natural flavors.

'Mile High Labs bulk CBD tincture lets product manufacturers accurately and consistently draw from large-scale batches,' said Kara Henry, product manager, Mile High Labs. 'This means lower costs and less hassle while delivering the same potency, consistency and quality that Mile High Labs is known for. Bulk barrels makes it easy for our business customers to 'tap it and pack it.''

Mile High Labs tincture is derived from hemp grown in the United States and refined to an isolate, meaning it is free of other cannabinoids and impurities. This results in a taste that is unparalleled in the industry.

Every product in the Mile High Labs portfolio carries the 'Mile High Labs Compliant CBD' seal, which symbolizes the highest industry standards for purity and consistency. From soil to oil, Mile High Labs is continuously demonstrating its commitment to creating safe, quality CBD ingredients at scale.

Mile High Labs bulk tincture is available to co-packers only. Fulfillment is processed on an order-by-order basis to ensure freshness and a 12-month shelf-life.

#### ABOUT MILE HIGH LABS

Mile High Labs is an industrial-scale CBD ingredient and product manufacturer offering reliable delivery of bulk CBD and co-packing services to the world's leading consumer brands. With a GMP-certified facility and extensive network of contracted cultivators, Mile High Labs supplies high-quality, high-volume CBD orders year-round. Mile High Labs extracts exclusively from industrial hemp material. More at [www.milehighlabs.com](http://www.milehighlabs.com).
